

TYPO3.Flow - Bug # 59013

Status:	Closed	Priority:	Should have
Author:	Carsten Bleicker	Category:	Log
Created:	2014-05-21	Assigned To:	Bastian Waidelich
Updated:	2014-05-22	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: Git master			
Subject:	SystemLogger does not log additional arguments		
Description			
The SystemLogger Interface supports additional arguments on exception logging. But they don't appear in the logfile.

Hi Carsten,

can you please add more details, this is not reproducible.. For example: The router calls

```
1$this->systemLogger->log('Router resolve(): Could not resolve a route for building an URI for the given route values.', LOG_WARNING, $routeValues);
```

which correctly creates

```
14-05-22 10:01:53 WARNING Flow Router resolve(): Could not resolve a route for building an URI for the given route values.  
@action => someaction  
@controller => some\controller  
@package => some.package
```

in the log

#2 - 2014-05-22 10:11 - Carsten Bleicker

hmm,

i used the exception logging. maybe this is the reason why its not reproducible?

```
$this->systemLogger->logException($noConverterFoundException, ['JobLabel' => $this->getLabel(), 'identifier' => $this->getIdentifier(), 'className' => $this->getClassName()]);
```

#3 - 2014-05-22 10:15 - Bastian Waidelich

I just recreated the example:

```
1$this->systemLogger->logException(new \TYPO3\FLOW\Exception('Test Exception', 123), ['JobLabel' => 'someLabel', 'identifier' => 'somelabel', 'className' => 'someClassName']);
```

Creates

```
14-05-22 10:14:25 CRITICAL Flow Uncaught exception #123: Test Exception - See also: 2014052210142421e9ae.txt
JobLabel => someLabel
identifier => somelabel
className => someClassName
```

Can I close the issue?

#4 - 2014-05-22 14:33 - Carsten Bleicker

Oh, sorry for this one.

I expected the additional info in the exception log itself :)

Please close it.
