Sprint Focus:	

Subject:	Catch all errors on adding files of sys_files to export

Description

Adding files from sys_file records is not robust enough.
E.g. if there are sys_file records, but no related files anymore, what
could happen for files in /uploads/tx_foo till #58967 is fixed a RuntimeException
is thrown.

Solution: catch all Exceptions thrown from Resources in export_addSysFile

Revision 3b86ba55 - 2015-03-05 20:48 - Marc Bastian Heinrichs

[BUGFIX] Catch all errors on adding files of sys_files to export

Adding files from sys_file records is not robust enough. For example
sys_file records could exist for already deleted files. In this case a
RuntimeException is thrown, which is not caught currently.

Solution: catch all Exceptions thrown from Resources in
export_addSysFile and report them to the user.

Resolves: #59015

Releases: master, 6.2

I've tested it, now I get this warning in ImpExp module:

    Core: Error handler (BE): PHP Warning: fileperms(): stat failed for /var/www/vhosts/.../htdocs/htdocs

    in /var/www/t3sources/typo3_src-6.2.2/typo3/sysext/core/Classes/Resource/Driver/LocalDriver.php line 1097

And for every time I open the ImpExp module again (for root node) another warning appears:

> ⚠ **PHP Warning**
> PHP Warning: fileperms(): stat failed for /var/www/vhosts/typo3sz/htdocs/htdocs in /var/www/t3sources/typo3_src-6.2.2/typo3/sysext/core/Classes/Resource/Driver/LocalDriver.php line 1097

> ⚠ **PHP Warning**

Import / Export

In this example I've opened the module six times. I've also opened it on other pages, then it works. But when I switch back to root, a new warning appears additionally.

#3 - 2014-05-22 11:35 - Marc Bastian Heinrichs

Ok, thx for testing. Perhaps we should prevent php warnings for fileperms...

Could give some details? You are on Win or Linux? What storages are configured?
