[BUGFIX] Extbase behaviour concerning workspaces

Issue #26732 introduced some behaviour into Extbase that cannot work on the long-run. The usual behaviour of TYPO3 is "fetch live, then overlay". Avoiding that chain might lead to several side-effects.

This change integrates a new property "_versionedUid" than contains the specific uid of the versioned record (this is similar to the already existing "_localizedUid" property). Besides that, changes of issue #26732 are reverted.

Functional frontend tests are enabled for live and workspace for all IRRE ForeignField scenarios.

Resolves: #59107

Releases: 6.2, 6.3

This workaround did the trick for me (I wrote the text in German):
<http://devsieben.tumblr.com/post/91247895755/typo3-workspace-irre-fix>

Sure it's not perfect but maybe a good start?!
