

TYPO3.Flow - Feature # 59244

Status:	New	Priority:	Should have
Author:	Carsten Bleicker	Category:	
Created:	2014-05-31	Assigned To:	
Updated:	2014-05-31	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Subject:	Message or Container needs context		
Description			
<p>In order to be able to publish f.e. page and plugin messages and show them at different places it could be usefull to set their context and also flush them by context.</p> <p>This could be done f.e. using an additional argument in the ActionController->addFlashMessage().</p> <p>Example:</p> <pre>public function addFlashMessage(..., ..., \$container = NULL){ if(\$container === NULL) \$container = \$this->flashMessageContainers->getDefaultContainer(); }</pre>
