Updated:	2012-05-21	Due date:	2010-06-25
Has patch:	No		
Subject:	Optional section rendering		
Description	<p>It would be nice to be able to make a section optional.</p> <p>If a template does not define the "food" section, then the default food will be shown if optional is set:</p> <pre><f:render section="food" optional="true"> <p>Default food: potato chips</p> </f:render></pre> <p>If a default value is not set, then it will render nothing:</p> <pre><f:render section="food" optional="true" /></pre> <p>If optional="true" is not set, then an exception will be thrown. This is the normal behavior so nothing should change for anyone unless they add the optional parameter.</p>

Wouldn't it be better if there were the possibility to check that the section's content is not empty?

```
<f:if condition="{section.sidebar}">
  <f:then>
    <f:render section="sidebar" />
  </f:then>
<f:else>
  <p>I'm sorry, nothing here!</p>
</f:else>
```
