Core - Bug # 59365

Status:	Resolved	**Priority:**	Should have
Author:	Alexander Bohndorf	**Category:**	
Created:	2014-06-05	**Assigned To:**	
Updated:	2015-01-27	**Due date:**	

TYPO3 Version:	6.1
PHP Version:	
Complexity:	
Is Regression:	No
Sprint Focus:	

Subject:	Session Lifetime for FE-Users can not be less than 6000 secs

Description

Setting the session lifetime to a value less than 6000 secs has no effect, f.e.

$GLOBALS['TYPO3_CONF_VARS']['FE']['lifetime'] = 1800;

results in the default lifetime of 6000 secs.

Reason for this is
\typo3\sysext\frontend\Classes\Authentication\FrontendUserAuthentication.php:171:

```
1      if (intval($this->auth_timeout_field) > 0 && intval($this->auth_timeout_field) < $this->lifetime) {
2         // If server session timeout is non-zero but less than client session timeout: Copy this value instead.
3         $this->auth_timeout_field = $this->lifetime;
4      }
```

and in __construct (line 144) is defined:

```
1$this->auth_timeout_field = 6000;
```

Maybe the fix suggested in #14836 (adapted to the 6.1 sources) could be the right solution?

adding the following line in \TYPO3\CMS\Frontend\Controller\TypoScriptFrontendController::initFEuser after line 912:

```
1$this->fe_user->auth_timeout_field = intval($this->TYPO3_CONF_VARS['FE']['lifetime']);
```

This behaviour was found in TYPO3 6.1.7.

Best regards

Alexander
