<b>Is Regression:</b>	No		
<b>Sprint Focus:</b>			
<b>Subject:</b>	Implement multiple checkbox in CheckboxViewhelper		
<b>Description</b>			
<p>To cover the case of multivalue-checkboxes in TYPO3 Core Fluid CheckboxViewhelper I have applied implementation of the FLOW.Fluid CheckboxViewhelper.</p> <p>I don't know whether it is enough but it looks like all to do is to change the method signature from</p> <pre>public function render(\$checked = NULL)</pre> <p>to</p> <pre>public function render(\$checked = NULL, \$multiple = NULL)</pre> <p>and remove the @todo annotation in the representing if condition:</p> <pre>elseif ((\$multiple = FALSE) === TRUE) {     // @todo: implement correct as in Flow.Fluid     \$nameAttribute .= '[]'; }</pre> <p>to</p> <pre>elseif (\$multiple === TRUE) {     \$nameAttribute .= '[]'; }</pre>
