Subject:	Import forces pid 0 if rootLevel = -1 is set in TCA

Description

Hi

When importing tx_gridelements_backend_layout records they are "forced" to the root level (pid=0).

Warnings in preview:
TABLE 'tx_gridelements_backend_layout' will be inserted on ROOT LEVEL!

I tried several export settings without success. Then I noticed that in Ext:gridelements **rootLevel=-1** is set for this table. (in TCA, ext_tables.php)

When I change it to rootLevel=0 or remove the entry it is possible to import records into a sysfolder (which is included in the same .t3d file).

It seems impexp does not respect -1 (= allow record on root level and normal pages). If it would handle -1 the same way as it does when rootLevel is not set at all it would work in our case. But we don't need/want to import records to the root level.

Regards, Pascal

Revision 0e7acd5a - 2015-03-14 01:20 - Marc Bastian Heinrichs

[BUGFIX] Fix wrong enforcement of pid 0 for rootLevel = -1 in impexp

The importer had no support for setting TCA ctrl rootLevel = -1 and
forces the import to pid 0, when a normal page id is also allowed.

Resolves: #59616
Releases: master, 6.2

It works with the patch. Gridelements are imported into the selected sysfolder now.

But I was confused at first because the alert message was still shown. Screenshot attached.

I tried it anyway and it worked.

After cloning TYPO3 I used the following link to checkout the patch. I'm not very familiar with git (yet), maybe I downloaded the wrong patch.

git fetch http://review.typo3.org/Packages/TYPO3.CMS refs/changes/66/31066/2 && git checkout FETCH_HEAD
