<b>Subject:</b>	IRRE related child records are not listed (comma separated list) in list module		
<b>Description</b>			
<p>If you configure a field's <b>type</b> as <b>inline</b> (and do not use the <b>MM</b> option) the field will hold an integer representing the number of related child records. So far so good.</p> <p>Bug description: if you display this field via "set fields" in the list module the field does not show a comma separated list of the related child records but displays the title of only one record - it is the record which UID equals the number of related child records: e.g. if 3 child records are related the shown record is the one having a UID of 3.</p> <p>please have a look at the enclosed screenshots showing EXT:news as an example.</p> <p>example-ext-news.png</p> <p>Note: if you use m:n relations with a MM-table a comma separated list is shown as expected.</p>

#### Revision 524ead97 - 2014-07-02 00:01 - Thomas Löffler

[BUGFIX] IRRE records are listed comma separated

IRRE records with foreign\_field instead of MM table  
are now listed as a comma separated list instead  
of wrongly using the number of records as the UID.

This Bug is related to #22970 reported since 4 Years and under review since 9 Month.

For images within the show item functionality I will get only the record uid, not the label of the image.
