Updated:	2014-07-01	Due date:	
Subject:	Selecting an image with the "Media" button in the "Inspector" "Image" section stopped working after update		
Description			
<p>Hi Guys,</p> <p>I just updated my Neos installation from 1.0.x to 1.1.x via the intructions on http://neos.typo3.org/download/upgrade-instructions.html. Now I can't select an image anymore. Neos just starts a spinner where the dummy image was and that's it. Looking into the request the server answers with an 404.</p> <p>The problem seems to be because of the ExtJS removal, here is the part of my log file:</p> <pre>14-06-20 17:22:17 19096 NOTICE Flow Router route(): No route matched the route path "neos/content/imageWithMetadata/2c17a0b5-c121-6db6-1b5e-71ac7624c03a". 14-06-20 17:22:17 19096 DEBUG Flow No CSRF required, safe request 14-06-20 17:22:17 19096 CRITICAL Flow Uncaught exception #1303209195 in line 74 of /my/path/Data/Temporary/Development/Cache/Code/Flow_Object_Classes/TYPO3_Flow_Mvc_Dispatcher.php: No controller could be resolved which would match your request. Package key: "", controller name: "Standard". (GET http://my.domain/neos/content/imageWithMetadata/2c17a0b5-c121-6db6-1b5e-71ac7624c03a) - See also: 2014062017221644a42f.txt</pre> <p>Did I do something wrong, or is this a bug?</p>			

History

#1 - 2014-06-20 18:08 - Tim Spiekerkötter

Okay, maybe I need to update my nginx configuration for the 1.1.x release?

#2 - 2014-06-21 15:35 - Tim Spiekerkötter

Okay, it works now. Sadly I changed nothing. It's just 22 hours later. So maybe it was some cache somewhere.

#3 - 2014-07-01 18:23 - Christian Müller

- Status changed from New to Resolved

Probably a cache issue.
