

## TYPO3.Neos - Bug # 59760

<b>Status:</b>	Closed	<b>Priority:</b>	Should have
<b>Author:</b>	Georg Ringer	<b>Category:</b>	Frontend
<b>Created:</b>	2014-06-21	<b>Assigned To:</b>	
<b>Updated:</b>	2014-10-04	<b>Due date:</b>	
<b>Subject:</b>	special char in template "Exception while rendering"		
<b>Description</b>			
<p>□□□□ If the template contains the char which is attached, then there is a not really helpful error</p> <p>Exception while rendering root: Exceeding segment end token after position 4644 (20140621110207d3942a)</p> <p>using 1.1</p>			

### History

#1 - 2014-07-01 15:12 - Christian Müller

- Status changed from New to On Hold

Well, this is our Cache segment end token (ETX - Ascii 3), we cannot fix this. It is a control character and should never come up. How did it appear in your template?

#2 - 2014-07-01 20:25 - Georg Ringer

i copied a template from the designer and it was in there. I don't plan to use this char.

maybe the templates should be checked before if this special char is in there and then a useful error could be shown.

#3 - 2014-07-01 20:25 - Georg Ringer

i copied a template from the designer and it was in there. I don't plan to use this char.

maybe the templates should be checked before if this special char is in there and then a useful error could be shown.

#4 - 2014-10-04 12:46 - Jonas Renggli

Moved to Jira: <https://jira.typo3.org/browse/NEOS-538>

#5 - 2014-10-04 13:42 - Bastian Waidelich

- Status changed from On Hold to Closed
