Updated:	2014-10-01	Due date:	
Subject:	Site Export skips empty contentcollection		
Description			
<p>I did a site export. One of my Nodetype contains additional childnodes. Some of them are empty and holding no subcontent nodes. Seems that these "contentCollection" nodes will be skipped in an export. I had to rebuild them after importing with flow node:autocreatchildnodes. Also empty contentCollections should be exportet?</p>
