TYPO3 Version:	6.2		
PHP Version:	5.3		
Complexity:			
Sprint Focus:			
Subject:	Wrong nesting of deleted versioned child records		

Description

Scenario/Actions:

  - having an IRRE parent-child structure (live)
  - backend, workspace selected
  - delete a child-record and save
  - the workspace module shows wrong nesting for deleted records

Reason:

The reference index points for the deleted element uses the live id, instead of the versioned id.

DataSet:

typo3/sysext/workspaces/Tests/Functional/DataHandling/IRRE/ForeignField/Modify/DataSet/modifyParentNDeleteHotelChild.csv
(sys_refindex not checked there)

Revision b6c71b9c - 2014-08-13 16:27 - Oliver Hader

[BUGFIX] Wrong nesting of deleted versioned child records

If deleting an IRRE child reference, the nesting leving in the
workspace module is not shown correctly. The reason for that is,
that the sys_refindex entry points to the live id of the deleted
child record.

This change takes care of correct visualization only, but does not
touch the sys_refindex behavior in this case.

Resolves: #59853
Releases: master, 6.2
