Revision f629924 - 2014-07-23 13:51 - Oliver Hader

[BUGFIX] Wrong sys_refindex for deleted child records

Workspace actions using the DataHandler trigger a reprocessing of the reference index. However, it happened that index entries of the live workspace have been deleted or modified.

The reason for that is a missing SQL statement to limit those actions to the current workspace only.

The result can be seen in e.g. the workspace module after having deleted an IRRE child record and how the nesting could not be determined correctly for that particular record.

Resolves: #59874

Releases: 6.2, 6.3
