Subject:	TYPO3CR Documentation Request		
Description			
<p>Dear TYPO3.TYPO3CR Team,</p> <p>i was searching for Documentation (independent from TYPO3.Neos) about this Package, but all i could find was this link http://de.slideshare.net/kfish/typo3-cr-in-phoenix from 2010. Looking at the Package stats on GitHub and the History, many things have changed since the last 4 years. A look into the Documentation Folder was also disappointing.</p> <p>Is there Documentation for this Package i missed? Is Documentation for this Package intended at all?</p> <p>Would be nice to have some Slides explaining how to properly create Nodes and NodeTypes for own use, what roles Contexts and Workspaces play, how everything is connected and last but not least, how to benefit in an own Package from TYPO3.TYPO3CR (, if possible. I know it was primary developed for Neos).</p>			

History

Hey Oliver, we decided not to split up the documentation for Neos over all packages we use as that would be 1) hard to maintain, and 2) not clear if someone searches for Neos docs. The downside: the doc folder of CR is awfully empty ;-). It's even still DocBook I see.

What you can do is check the Neos integrator guide, like for example:

<http://docs.typo3.org/neos/TYPO3NeosDocumentation/IntegratorsCookbook/CreatingContentElement.html>

<http://docs.typo3.org/neos/TYPO3NeosDocumentation/IntegratorGuide/ContentStructure.html>

<http://docs.typo3.org/neos/TYPO3NeosDocumentation/IntegratorGuide/CustomContentElements.html>

Hope that clears up something already, otherwise please update this issue again so we know what is missing.
