| Subject: | Scheduler Task aborts if LDAP re | turns entry without dn | | |
| Description | | | | |
| The scheduler tas | k does two things: | | | |
| 1. Get all entrie | s by predefined settings | | | |
| 2. Get details fo | or each entry by dn | | | |
| | | | | |
| - | a result for step 1: | | | |

| _ | | | | |
| But as you see, so | omehow I get entries back, which has no | dn. So the second step, which | ch fetches the de | etails by dn, fails. |
| | | | | |
| The fix is very sim | ple (I've attached a patch, and will push | it to Gerrit as well), but now t | he scheduler tas | k does not interrupt anymore |
