Is Regression:	No		
Sprint Focus:			
Subject:	Database table structure for fe_groups is incomplete		
Description			
<p>If your using frontend usergroups via extbase and creating new groups via extbase - you will have a problem when you want to use the new groups.</p> <p>In the database structure the description, subgroup and TSconfig property has no default and no "NOT NULL". So if you create the new group via extbase the group has the value NULL for subgroup and this gives you a nice exception.</p> <p>In my opinion it don't hurts if we add "NOT NULL" to this properties.</p> <p>In extbase we also have no default value for the tx_extbase_type property. The core always writes a 0 in this field, but when you create the record via extbase and don't care about this field, the field is empty. To be consistent we should also define a default value for that.</p>

Revision 2351b207 - 2014-07-24 12:14 - Markus Günther

[BUGFIX] Complete datatable structure fe_groups

While creating frontend groups via extbase without any subgroup set, the record will have the value NULL in the database for the property subgroup. This leads to an exception.

This patch only defines TSconfig, subgroups and description not to accept NULL and to be consistent the tx_extbase_type gets the default value 0.

Resolves: #60245

Releases: 6.3, 6.2
