

Core - Bug # 60264

Status:	Resolved	Priority:	Must have
Author:	Jan Schreier	Category:	
Created:	2014-07-11	Assigned To:	
Updated:	2015-01-16	Due date:	
TYPO3 Version:	6.2		
PHP Version:			
Complexity:			
Is Regression:	No		
Sprint Focus:			
Subject:	felogin permalogin not working with typo3 6.2.x -> cookie expires with session		
Description			
<p>Since Typo3 6.2.x there is a new value in the login process called: dontSetCookie</p> <p>This is set to TRUE by default in frontend\classes\Authentication\FrontendUserAuthentication.php</p> <p>and verified in AbstractUserAuthentication.php</p> <p>theoretically dontSetCookie should be set to "false" during the login process but it is apparently not the case resulting in the cookie set for login expire with the session.</p>

Revision 74857fb0 - 2014-07-24 14:21 - Gernot Schulmeister

[BUGFIX] Set correct cookie when permalogin is enabled

Although permalogin is enabled we set a session cookie.
This happens because setSessionCookie is called too early
and we do not know yet whether the session should be permanent
and an according cookie shall be set or not.

Solution is to set \$this->dontSetCookie = FALSE
which triggers setting the cookie at an appropriate time.

Resolves: #60264
Releases: 6.3, 6.2

Hi Jan,

what did you configure to enable permalgin?
What is set in the Install Tool for FE-cookies?

#2 - 2014-07-11 10:55 - Jan Schreier

hi Markus,

I got:

```
'FE' => array(  
    'activateContentAdapter' => '0',  
    'checkFeUserPid' => '1',  
    'compressionLevel' => '5',  
    'cookieDomain' => "",  
    'cookieName' => 'mydomain_typo_user',  
    'disableNoCacheParameter' => '0',  
    'lifetime' => '60480000',  
    'lockIP' => '0',  
    'loginSecurityLevel' => 'normal',  
    'pageNotFoundOnCHashError' => '0',  
    'permalgin' => '1',  
)
```

and

```
'SYS' => array ('cookieDomain' => '.mydomain.de',)
```

#3 - 2014-07-11 12:31 - Pierrick Caillon

I also encounter the same issue.

I saw the TYPO3\CMS\Core\Authentication\AbstractUserAuthentication::setSessionCookie() method is explicitly called from TYPO3\CMS\Frontend\Authentication\FrontendUserAuthentication::createUserSession(). I understand this is done because of the definition of dontSetCookie to TRUE in TYPO3\CMS\Frontend\Authentication\FrontendUserAuthentication::__construct(). This way the session cookie is always set, because the setSessionCookie method always determine that the cookie is for the session in this case, as the user is not yet defined.

On workaround would be to call setSessionCookie another time in FrontendUserAuthentication::createUserSession if permanent login is requested. This way, the not session cookie will also be defined.

It may be a better approach to set only one cookie. For this, in FrontendUserAuthentication::createUserSession, to instruction order must be reversed. AS there is a return value in the call to AbstractUserAuthentication::createUserSession, it must be saved and returned after.

I am doing some more tests.

#4 - 2014-07-11 12:41 - Pierrick Caillon

```
As a workaround, I have changed the method FrontendUserAuthentication::createUserSession to      1      $this->setSessionCookie();
2      $data = parent::createUserSession($tempuser);
3      if ($data['ses_permanent']) $this->dontSetCookie = FALSE;
4      return $data;
```

in my source. I should override it outside.

#5 - 2014-07-13 12:02 - Gernot Schulmeister

I had the same problem with the permalogin. The solution mentioned above by Pierrick worked fine for me and I pushed it to Gerrit.

<https://review.typo3.org/#/c/31607/>

The status of the ticket did not change. Is this correct?

#6 - 2014-07-15 16:12 - Markus Klein

- Status changed from New to Under Review

#7 - 2014-07-24 14:21 - Gerrit Code Review

Patch set 1 for branch **TYPO3_6-2** of project **Packages/TYPO3.CMS** has been pushed to the review server.

It is available at <http://review.typo3.org/31754>

#8 - 2014-07-24 14:30 - Gernot Schulmeister

- Status changed from Under Review to Resolved

- % Done changed from 0 to 100

Applied in changeset commit:74857fb0e4cb259b6cc8dabf8aced3e3679a2384.

#9 - 2014-12-17 16:09 - Andre Michels

I think its still buggy.

I got here a fresh install of 6.2.7 and want to to a login in the context of my extension.

So i call:

```
$GLOBALS['TSFE']->fe_user->createUserSession
```

But this doesnt create a cookie because in **line 125 of FrontendUserAuthentication.php**

```
$this->dontSetCookie = TRUE;
```

Line 266 in FrontendUserAuthentication.php in does not seems to be effective... Something might be broken since the last patch...

```
$this->dontSetCookie = FALSE;
```

Workaround

Clearly it helps to remove line 125, But i realy dont know what i do there :)

#10 - 2014-12-17 21:55 - Markus Klein

@Andre: First, 6.2.7 is fairly old already again. ~80 new bugfixes are in 6.2.9 now.

Your problem is not a bug in the core, but you're using (as many others as well) internal core API.

All you need to do after your call to `$GLOBALS['TSFE']->fe_user->createUserSession` is to set some dummy data to the user session.

See also my fix for onetimeaccount:

https://git.typo3.org/TYPO3CMS/Extensions/onetimeaccount.git/blobdiff/b9bca530b155bb10d68ce3bef614db7d158b1bc3..d9dd642338ea8cc00de0c422d2cd6bc0d219cad:/pi1/class.tx_onetimeaccount_pi1.php

#11 - 2014-12-18 17:06 - Andre Michels

Thank you for your help.

Your workaround looks much better but its still a workaround.

There have to be something wrong in the FrontendUserAuthentication.php

#12 - 2014-12-19 01:56 - Markus Klein

There is nothing wrong. The behaviour is totally fine.

Calling `createUserSession()` does not mean that a cookie needs to be placed in all cases. e.g. when there's no data in the session.

The core is now really working well and avoids FE cookies whenever possible.

#13 - 2015-01-16 09:20 - Mirko grothe

sorry, wrong bug

(<https://forge.typo3.org/issues/62194>)
