<b>Subject:</b>	Grid Element + DCE		
<b>Description</b>			
Hi ;			
When I put a new DCE element and i try to edit I have a error " Sorry, you didn't have proper permissions to perform this change." But when I put DCE element to Grid Content I can edit this record.

So when I got you right, the problem exists outside Gridelements only?  
Then this is not the right tracker - I will move it to the DCE tracker.

The problem exists outside Gridelements if on current page we have one or more Grid elements, but when our page doesn't have GridElement I can edit DCE element

Did you checkout the latest repository version of Gridelements?  
Should be fixed in current 3.0.0-dev master.

Some about my setup :

TYPO3 6.2.4

DCE 10.2

Grid Element : I using branch muster from git.

But What I'm I noticed today : When I click direct Edit icon I have e error, but when I click right button and next I choose edit option from drop-down menu I can edit this DCE element and I didn't have a error.
