

## TYPO3.Flow - Bug # 6028

<b>Status:</b>	Resolved	<b>Priority:</b>	Must have
<b>Author:</b>	Karsten Dambekalns	<b>Category:</b>	Persistence
<b>Created:</b>	2010-01-14	<b>Assigned To:</b>	Karsten Dambekalns
<b>Updated:</b>	2010-10-20	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>			
<b>Complexity:</b>			
<b>Affected Flow version:</b>			
<b>Subject:</b>	DataMapper cannot handle wrongly typed input.		
<b>Description</b>			
When a property value comes back from the persistence depths as string, but is supposed to be an integer (or some other type), it is processed as string. That leads to problems when persisting again and changes data, which obviously should not happen.			

### Associated revisions

Revision b29cf27b - 2010-01-14 17:42 - Karsten Dambekalns

[+BUGFIX] FLOW3 (Persistence): DataMapper now typecasts values to the intended type when mapping properties. Fixes #6028.

[+BUGFIX] FLOW3 (Persistence): DateTime properties being NULL can be persisted now. Fixes #6029.

[+BUGFIX] FLOW3 (MVC): Removed some strtolower() calls in Router to enable consistently cased template folders. Fixes #6030.
