

TYPO3.Flow - Bug # 6030

Status:	Resolved	Priority:	Should have
Author:	Karsten Dambekalns	Category:	MVC
Created:	2010-01-14	Assigned To:	Karsten Dambekalns
Updated:	2010-10-20	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	Router needlessly lowercases names of package, controller, action		
Description			
<p>Templates in Fluid need to be in a path whose parts have to be lowercased, which breaks consistency. That is caused by the Router applying strtolower() on a bunch of values in setControllerKeysAndFormat(). Furthermore some of those calls are double-whoppered, e.g. for the package key. Just check what happens in Request::setControllerPackageKey()...</p>			

Associated revisions

Revision b29cf27b - 2010-01-14 17:42 - Karsten Dambekalns

[+BUGFIX] FLOW3 (Persistence): DataMapper now typecasts values to the intended type when mapping properties. Fixes #6028.

[+BUGFIX] FLOW3 (Persistence): DateTime properties being NULL can be persisted now. Fixes #6029.

[+BUGFIX] FLOW3 (MVC): Removed some strtolower() calls in Router to enable consistently cased template folders. Fixes #6030.
