TYPO3 Version:	6.2				
PHP Version:	5.3				
Complexity:					
Is Regression:	No				
Sprint Focus:					
Subject:	Metadata does not recognize workspace				
Description	Metadata retrieved from table sys_file_metadata does not recognize workspaces. Therefore users in a draft workspace can't make use of metadata. (Metadata of new files in the LIVE-workspace is empty by default of course.)				
Subtasks:	Bug # 62986: No workspace preview for sys_file_metadata				
Related issues:	duplicated by Core - Bug # 62537: Fileadmin meta data in workspace (FAL)

Revision 2a637539 - 2014-11-14 20:32 - Helmut Hummel

[BUGFIX] Make sys_file_metadata publishable

Currently sys_file_metadata records that are edited in a workspace cannot be published because the workspace module does not know about ignored root level restrictions and these records are on root level by definition.

Include the root page when searching for workspace records and show elements for which root level restriction is ignored.

Resolves: #60343

Releases: 6.2, master

History

#1 - 2014-11-12 15:03 - Alex Kellner

Hi,

I think I have the same issue here.

I try to describe it a bit more.

If you're using workspaces and have editors, you have to select DB-Mount-Points for the be_groups. You can let the DB-Mount-Points empty for workspaces but normally you would also select a page. Letting Mount-Points empty for groups had the effect, that the editor have no pages in pagetree. Selecting root is possible for both records as long as you click on save - after a reload "0" is removed.

This is the main issue. Because records of type sys_file_metadata have pid=0 per default. So the editor has no chance to publish a sys_file_metadata record in TYPO3

Configuration

- TYPO3 6.2.6
- Draft Workspace
- BE-User (editor) with most available rights (really all tables)

How to reproduce

- Editor change workspace to draft
- Upload an image in filelist to any folder
- Edit the record and save some title, altText, description
- Editor will also create a new content record (type Image) with a relation to the uploaded image before
- The default title of the image should be used (also description and altText)
- The editor (or another editor) is going to publish the changes, but in Workspace Module only the new tt_content element is shown (not the metadata-record)

Workaround

- A quick proof confirmed: Changing the pid of the metadata-record directly in the database to any existing page (where the publishing-editor has access to) will help. Now it's possible to publish both records
- So, if I would create an extension with a small TCA configuration to extend sys_file_metadata, I could insert a value to field PID.

BTW: I'm not totally sure but I think ticket #62537 could be related to this one

#2 - 2014-11-14 12:16 - Gerrit Code Review

- Status changed from New to Under Review

Patch set 1 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.

It is available at <http://review.typo3.org/34156>

#3 - 2014-11-14 20:32 - Gerrit Code Review

Patch set 1 for branch **TYPO3_6-2** of project **Packages/TYPO3.CMS** has been pushed to the review server.

It is available at <http://review.typo3.org/34183>

#4 - 2014-11-14 20:35 - Gerrit Code Review

Patch set 2 for branch **TYPO3_6-2** of project **Packages/TYPO3.CMS** has been pushed to the review server.
It is available at <http://review.typo3.org/34183>

#5 - 2014-11-14 21:01 - Helmut Hummel
