

Core - Bug # 60397

Status:	Closed	Priority:	Should have
Author:	Jan Wulff	Category:	
Created:	2014-07-19	Assigned To:	
Updated:	2014-08-01	Due date:	
TYPO3 Version:	6.2		
PHP Version:			
Complexity:			
Is Regression:	No		
Sprint Focus:			
Subject:	Access denied when using pencil icon on translated elements in page module		
Description			
<p>I've just upgraded an installation from 4.5 to 6.2 and there is some strange behaviour now. In the page module even an admin user gets a message, that he is not allowed to edit an element if:</p> <ul style="list-style-type: none">- the element is not in the default language- and the pencil button in the page module is used to open the edit form. <p>Opening the element in the list module or clicking on the text of the element in the page module works without problems.</p>
