Hi!

I checked all usages of this config option in the code.

Unfortunately, I have to tell you that this option is only used in FE when rendering filelinks (stdWrap), but not at all in BE.

So clearly the description of this option is totally wrong and the option itself is totally outdated.

Where do you want to hide the thumbs?

Hi!

I have a (backend) page with over 200 textpic elements (translations included).

The page speed is very low, because the thumbnail rendering and the image loading took a while.

Have you an idea?

#3 - 2014-07-24 18:38 - Markus Klein

Hm, seems like this was changed with 6.0 or 6.1.

I'm still searching for the commit.
