Complexity:			
Is Regression:	No		
Sprint Focus:			
Subject:	Bug #60199 still exists		
Description			
#60199			
I can confirm that this is still a core bug in the 'Languages' view with TYPO3 6.2.4, it works with and without the gridelements extension with TYPO3 6.2.3, so why has this been closed?			

Updated by Robert Heinig 19 days ago			
With the gridlements-Fix this problem was only partially solved.			
I uninstalled gridelements and I´m still experiencing this error in page module mode "languages" - it works in "columns" mode.

Currently having the same problem. Even without gridelements the error still occurs in the language module, when clicking the edit icon. Directly clicking on an element oder rightclick and then "edit" does not show up this error.
