Is Regression:	No
Sprint Focus:	

Subject:	Cannot edit lazy loaded objects

Description

Lazy loaded objects cannot be edited through Fluid forms.

Given the following form:

```
<f:form name="bar" object="{foo.bar}">
  <f:form.textfield property="propertyOfBar"/>
  <f:form.submit value="Update"/>
</f:form>
```

If "bar" of "foo" is an instance of TYPO3\CMS\Extbase\Persistence\Generic\LazyLoadingProxy the initial check in
TYPO3\CMS\Fluid\ViewHelpers\Form\AbstractFormViewHelper::renderHiddenIdentityField fails because the LazyLoadingProxy
instance cannot be an instance of TYPO3\CMS\Extbase\DomainObject\AbstractDomainObject. This prevents the hidden identity field
from being rendered which makes editing impossible.
