

TYPO3.Flow - Bug # 61

Status:	Closed	Priority:	Must have
Author:	Sebastian Kurfuerst	Category:	Utility
Created:	2007-07-13	Assigned To:	Robert Lemke
Updated:	2010-10-20	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	Errors in Framework_Utility_Environment::getScriptRequestPathAndName with mod_fcgid		
Description			
<p>Hello,</p> <p>I am running PHP with mod_fcgid - and it transmits the path in a wrong way:</p> <p>I needed to apply the following patch to make it work properly on my installation - but I did not yet find any good ressources about the difference between orig_script_filename and script_filename.</p> <p>So I currently think that the patch fixes just the symptoms...</p> <p>My phpinfo() is also attached.</p> <p>Greets,</p> <p>Sebastian</p>			

History

#1 - 2007-07-13 08:42 - Robert Lemke

- Status changed from New to Closed
- Sprint set to fixed

(In r260) Applied Sebastians patch - this solution works for me too (Mac, Apache2). Hopefully fixes #61 ...
