Sprint Focus:	

Subject:	Fix t3skin box-sizing CSS bugs

Description

Bootstrap and Foundation are based on the CSS box-sizing model "border-box".
Dimensions are set explicitly in a few places in t3skin.

Adapt the pixel dimensions or better: remove the explicit dimension constraints.
We might use this issue as an umbrella for few tasks.

Remember:
During ExtJS 4 migration we solved many bugs already

[BUGFIX] Reset ExtJS 3 CSS box-model

We have box-models in CSS. They define how the dimensions of
elements are calculated. Modern CSS is based on the border-box
outline definition where the **outer** dimensions are defined and
not the **inner** dimensions.

Bootstrap, Foundation and ExtJS 4 use the modern box sizing
"border-box". This is the default now.

ExtJS 3 CSS is based on the "old" content-box definition. Since
CMS still uses ExtJS 3 we need to move ExtJS elements back into
the former box-sizing mode.

This patch sets box-sizing back to the previous content-box for
input fields. Most dimensions in other widgets and elements are
calculated with the help of JS and not based on CSS itself. Thus
.x-form-field should be enought for the start.
