

Advanced Frontend Editing - Bug # 61616

Status:	New	Priority:	Should have
Author:	Karsten Nowak (undkonsorten)	Category:	
Created:	2014-09-15	Assigned To:	
Updated:	2015-07-09	Due date:	
Subject:	404 page if iy try to make a link in rte		
Description			
<p>After Update to TYPO3 6.2 i try to make a link in rte text editor. A popup with 404 page is shown instead of the TYPO3 link browser. Only if i switch to rich text editor in fullscreen the popup show me the link browser.</p> <p>feedit issue or core issue?</p> <p>And another little thing. The icons for header link and switch to fullscreen mode for rte are wrong. See screenshot.</p> <p>TYPO3 6.2.4</p> <p>feeditadvanced 1.6.0</p>			

History

#1 - 2014-10-31 10:31 - Adrien Jacob

I confirm this bug in 6.2.6 as well...

The RTE editor opens an iframe pointing to mod.php, whereas the current folder is not /typo3/, triggering a 404 error.

#2 - 2015-07-09 11:55 - Stefan Dierks

I confirm the bug in 6.2.14

Might be related to <https://forge.typo3.org/issues/64179>, since both bugs are occur when using feeditadvanced only
