

Core - Bug # 61689

Status:	New	Priority:	Must have
Author:	Andreas Kiessling	Category:	File Abstraction Layer (FAL)
Created:	2014-09-17	Assigned To:	
Updated:	2014-09-17	Due date:	
TYPO3 Version:	6.2		
PHP Version:			
Complexity:			
Is Regression:	No		
Sprint Focus:			
Subject:	Error on localizing FAL record in workspace		
Description			
<p>This error message is shown after creating localizing a file / sys_file_metadata record: "1: These fields are not properly updated in database: (file) Probably value mismatch with fieldtype."</p> <p>I had a look at the values that are compared in the DataHandler for the sys_file_metadata record:</p> <p>value from database: 0</p> <p>is compared to: [PLACEHOLDER, WS#16]</p> <p>In the database however, the value seems to be fine and points to the right file id. Maybe this value is set and saved later.</p>
