Subject:	Warnings on flushing whole workspace with localizations		
Description	<p>Flushing a whole workspace in the workspace, which contains record localizations, shows warnings like this in the workspace module:</p> <p>Attempt to reset workspace for record failed: No record</p> <p>The reason for that is simple, the record already has been flushed since it's a localization.</p> <p>Thus, either the warning can be omitted by tracking already processed elements or record localizations need to be processed before the default record.</p>		
Related issues:	related to Core - Bug # 62155: IRRE at localized records not working properly... Rejected 2014-10-10
