PHP Version:			
Complexity:			
Sprint Focus:			
Subject:	Improve the handling of media files		
Description			
Currently TYPO3 CMS has no easy/working way for embedding media files into your content other than images.			
There is the Media and Multimedia content element but these have some flaws for example it is not possible to use the iframe rendering of YouTube or Vimeo movies.			
Further shouldn't there be any difference for the editors between adding a video (local or remote YouTube, Vimeo etc) or an image to a content element.			
Subtasks:			
Feature # 61800: Registry for adding file rendering classes			Resolved
Feature # 66366: Add MediaViewHelper			Under Review
Feature # 66371: Add autoplay option to			Under Review
