PHP Version:			
Complexity:			
Sprint Focus:			
Subject:	Reorganize Content Element properties within backend Extension		
Description			
To be prepared for the future of new Content Elements many properties of tt_content should be refactored. Main problems are: Unused/antiquated fields, unclear naming, un-deterministic spelling. As discussed at the T3UXW14 the best technical approach is to move fields to EXT: css_styled_content. Allow extensions for alternative Content Elements with Rendering. As a first step for a clean up and refactored tt_content properties - specific properties should be moved to EXT: css_styled_content. New approaches for Content Elements are born with EXT: content_elements and EXT: fluid_contentelements or futuristic Content Element Types.			
Subtasks:			
Task # 61842: Refactor CSS-Styled-Content + Content Elements			New
Feature # 13230: tt_content.search.20 should be done with the new FORM mapping			Needs Feedback
Feature # 13229: tt_content.login.20 should be done with the new FORM mapping			Accepted
Task # 60801: Remove "tt_content >" from SYSEXT: css_styled_content			Rejected
Bug # 48066: Remove content element Bullet List and migrate data			Closed
Feature # 49547: Media content element: HTML5 as standard			New
Feature # 47709: File Links content element icon/thumb list usability			New
Feature # 44779: No css_styled_content on content element TABLE			Resolved
Bug # 39518: Page: content element icons inconsistent			Accepted
Task # 34794: CSS Styled Content should ship HTML5 by default			Resolved
Bug # 14166: Content Type TABLE does not allow 0 cellspacing			New
Bug # 37670: Text with image - image dimensions			Closed
Bug # 38460: Using media-element --> Flashfallback fails			Accepted
Bug # 42070: Media CE (HTML5 <video> element) controls don't work on Chrome			Closed
Bug # 43420: Media element does not render any output			Closed
Bug # 44633: Media-element: Vimeo-video can not play via HTML5			New
Feature # 47581: Offer possibility to have ordered list with CType bullets			Rejected
Bug # 49476: css_styled_content borderThick could not be set to 0			New
Bug # 53305: HTML5 rendering of headers works only if a date is set			Closed
Bug # 56105: image position below: No margin-bottom if more than one image			New
Bug # 62682: Separate core and css_styled_content			Closed

precedes Core - Feature # 61839: Include modern Content Elements		New	2015-07-07

History

#1 - 2014-09-24 12:02 - Felix Kopp

Keep only the necessary basic properties for Content Elements:

- + Authoring (user, tstamp, time)
- + Hierarchy (position, sorting, parent page)
- + Visibility (frontend user access, access time,)
- + Channel (language, workspace)

Move everything else to CSS-Styled-Content.

#2 - 2014-09-24 12:04 - Felix Kopp

- Subject changed from Move Content Element fields to CSS-Styled-Content to Strip down Content Element

Move additional properties of Content Elements to CSS-Styled-Content.

TYPO3 core will deliver CSS-Styled-Content and a modern version of CSS-Styled-Content with modern Content Elements plus migration wizard.

#3 - 2014-09-24 12:07 - Felix Kopp

- Subject changed from Strip down Content Element to Reorganize Content Element properties within backend Extension

#4 - 2014-09-24 12:13 - Patrick Broens

This means tt_content table definitions, TCA, language labels and user functions, used in TCA
