PHP Version:	
Complexity:	
Sprint Focus:	
Subject:	Allow script tags to have custom attributes

Description

This is primarily intended to be used with **async** and **defer** attributes which allow non-blocking rendering in the browser and defered execution.

It could also allow, once implemented, to have custom attributes on script tags which are popular in the form of data attributes (popularily is the requirejs data-main tag).

I felt like asset handling in-core wise needed a little love and this is intended to be a first step.

I'll upload a WIP changeset to Gerrit soon.

- Status changed from Under Review to Needs Feedback

After you abandoned your patch. Is something left to get this issue done?

#6 - 2015-07-15 12:26 - Cedric Ziel

No, thx. Please close it for the time being.
