<b>Is Regression:</b>	No		
<b>Sprint Focus:</b>			
<b>Subject:</b>	I have no session cookie after using FE_SESSION_KEY		
<b>Description</b>			
<p>I use the FE_SESSION_KEY to use one login with different (out of Browser) applications. Since typo3 version 6.2 I could still login but there is no session Cookie set.</p> <p>The property AbstractUserAuthentication::dontSetCookie is confusing me. If it is FALSE it works. if it is TRUE it doesn't. Unfortunately it is set in FrontendUserAuthentication::__construct() to TRUE with the following Comment:</p> <pre>// Disable cookie by default, will be activated if saveSessionData() is called, // a user is logging-in or an existing session is found</pre> <p>Unfortunately it is NEVER activated! And AbstractUserAuthentication::forceSetCookie has no effect! And saveSessionData() does not exists!</p> <p>Here is my workaround in TypoScriptFrontendController (of course there are many ways to fix it):</p> <pre>public function initFEuser() {     // ...     if (GeneralUtility::_GP('FE_SESSION_KEY')) {         // ...         if (md5((\$fe_sParts[0] . '/' . \$this-&gt;TYPO3_CONF_VARS['SYS']['encryptionKey'])) === (string)\$fe_sParts[1]) {             // ...             \$this-&gt;fe_user-&gt;forceSetCookie = 1;             \$this-&gt;fe_user-&gt;dontSetCookie = FALSE; // THIS IS MY FIX</pre>

### Associated revisions

**Revision 8983b318 - 2015-03-19 01:21 - Nils Heuermann**

[BUGFIX] Set session cookie when FE\_SESSION\_KEY is used

When a FE\_SESSION\_KEY is set in get/post data the cookie for the frontend user session should be set. Due to changes in #55549 this did

not happen any more. dontSetCookie is now set to FALSE so that the cookie is set again.

Resolves: #62100

Releases: master, 6.2
