

## Core - Bug # 62247

<b>Status:</b>	Rejected	<b>Priority:</b>	Should have
<b>Author:</b>	Benjamin Mack	<b>Category:</b>	File Abstraction Layer (FAL)
<b>Created:</b>	2014-10-15	<b>Assigned To:</b>	Benjamin Mack
<b>Updated:</b>	2014-11-30	<b>Due date:</b>	
<b>TYPO3 Version:</b>	6.2		
<b>PHP Version:</b>			
<b>Complexity:</b>			
<b>Is Regression:</b>	No		
<b>Sprint Focus:</b>			
<b>Subject:</b>	FAL: Uppercase File Extensions of Image cannot be displayed		
<b>Description</b>			
<p>If a TYPO3 installation uses the UTF8-enabled filesystem to allow uploading of any file name, it is possible to upload files named myimage.JPEG instead of automatically lower-cased etc.</p> <p>A lot of checks for the file extension in the TYPO3 Core are done to check via GeneralUtility::inList() which only checks for the lowercase file endings.</p> <p>The bigger picture is to have this in a centralized place to check if the file can be processed, but for now, all the checks that still didn't work are replaced by checking for a lower-cased file extension.</p>
