

Core - Bug # 62253

Status:	Accepted	Priority:	Must have
Author:	Daniel Wagner	Category:	File Abstraction Layer (FAL)
Created:	2014-10-15	Assigned To:	
Updated:	2014-10-20	Due date:	
TYPO3 Version:	6.2		
PHP Version:	5.3		
Complexity:			
Is Regression:	No		
Sprint Focus:			
Subject:	FAL exception if file does not exist		
Description			
<p>Hello,</p> <p>trying to migrate a 4.5 LTS to a 6.2.5 LTS system, which remains on the same machine with [SYS][UTF8filesystem]=0 (to exclude filesystem problems like utf8, case-sensitivity,...). The scheduled FAL-indexer fails due to an exception (Execution of task "File Abstraction Layer: Update storage index (scheduler)" failed with the following message). The Exception is thrown from canonicalizeAndCheckFilePath(...) in \TYPO3\CMS\Core\Resource\Driver\LocalDriver.</p> <p>The problem is that there are files in fileadmin containing backslashes, questionmarks and other curious chars which should not exist. (Often there exists a copy of the file with chars replaced by underscore.)</p> <p>Here canonicalizeAndCheckFilePath(...) converts \ into / with the help of PathUtility::getCanonicalPath(...): Prix d\excellence.pdf -> Prix d/excellence.pdf.</p> <p>It would be helpful if the scheduled FAL-indexer would keep track of all these exceptions but continue indexing.</p>
