

Core - Bug # 62409

Status:	Closed	Priority:	Must have
Author:	Jochen Weiland	Category:	
Created:	2014-10-22	Assigned To:	
Updated:	2014-10-23	Due date:	
TYPO3 Version:	4.5		
PHP Version:	5.2		
Complexity:	easy		
Is Regression:	No		
Sprint Focus:			
Subject:	TYPO3 4.5.37 not compatible with PHP 5.2.x		
Description			
<p>On typo3.org the system requirements for TYPO3 4.5 state a minimum version of PHP 5.2.</p> <p>After upgrading a system from 4.5.36 to 4.5.37 I encountered the following error message in FE:</p> <p>Fatal error: func_get_args(): Can't be used as a function parameter in t3lib/class.t3lib_div.php on line 5432</p> <p>The function func_get_args() can't be used as a function parameter in PHP < 5.3. In PHP versions <= 5.2 the output of the function needs to be saved to a variable which then can be used as parameter.</p> <p>Possible fix (of course a better fix is to switch to PHP 5.3 or higher):</p> <p>Replace</p> <pre>\$instance = self::instantiateClass(\$finalClassName, func_get_args());</pre> <p>with</p> <pre>\$v = func_get_args(); \$instance = self::instantiateClass(\$finalClassName, \$v);</pre>

History

#1 - 2014-10-23 00:08 - Markus Klein

- Status changed from New to Closed

Hi Jochen, this is already fixed in the 4.5 branch with #62391.

Closing this as duplicate.

#2 - 2014-10-23 12:12 - Martin Bless

Just for info and completeness: Another workaround seems to be

```
$TYPO3_CONF_VARS['SYS']['exceptionalErrors'] ^= E_STRICT;
```

in the localconf.php.

Oops, I just noticed, that the problem I'm writing about in my blog is something different.
But I guess it has the same underlying reason (strict standards becoming active).
