[BUGFIX] Too many tags by identifier in CacheBackends

This patch is a backport of 3d93017022a8ef03842d75f2d7bd3912365c95be.

Applies to Apc/Memcached backends.

After an array\_merge the values aren't unique. This leads to duplicate tags per identifier. This patch changes that and also moves the findTagsByIdentifier call out of the foreach loop.

Resolves: #62513

Releases: 4.5
