Revision 737613db - 2014-11-01 21:48 - Helmut Hummel

[BUGFIX] Fix script URLs for traditional modules

The introduction of CSRF protection for backend modules introduced a regression for traditional modules.

Previously the script was calculated correctly if not provided. Now API calls without providing the script are assumed to be mod.php dispatched.

Fix that by checking if the M GET argument was sent and fall back to traditional URL calculation.

Resolves: #62569

Releases: 6.2, master
