<b>Created:</b>	2010-02-01	<b>Assigned To:</b>	Sebastian Kurfuerst
<b>Updated:</b>	2010-10-20	<b>Due date:</b>	
<b>Has patch:</b>			
<b>Affected Flow version:</b>			
<b>Subject:</b>	Not possible to create link to Typo3-Pages with additional piVars		
<b>Description</b>			
If I want to create a link to a Typo3-Page and add additional attributes for old-style pibase-Plugins the Viewhelper throws an exception:			
#1237900520: The argument additionalAttributes was registered with type array, but is of type string in viewhelper Tx_Fluid_ViewHelpers_Link_PageViewHelper			
Try the following:			
<code>&lt;f:link.page pageUid="{detailsPage}" additionalAttributes="{tx_ltpdb_test[argument]: 234}"&gt;Test&lt;/f:link.page&gt;</code>

i can confirm this behavior.

I can confirm this behaviour, too.

Without squared brackets the link creation works fine. Special characters like squared brackets or their replacements %5B and %5D somehow seem to break the creation of the array.

I found out, how to solve the Problem.

Actually the UriBuilder accepts the arguments with a prefix in the following syntax:

```
<f:link.page pageUid="{detailsPage}" additionalAttributes="{tx_ltpdb_test: {argument : 234}}">Test</f:link.page>
```

This will result in a proper link like this:

```
<a href=".....&tx_ltpdb_test[argument]=234...">Test</a>
```
