TYPO3.Fluid - Bug # 6298

Status:	Resolved	**Priority:**	Should have
Author:	Falk Kühnel	**Category:**	
Created:	2010-02-01	**Assigned To:**	
Updated:	2010-10-20	**Due date:**	
Has patch:			
Affected Flow version:			
Subject:	action gets converted to lowercase		

Description

If i recall correctly, this was done to somehow get teh dispatcher to ignore cases for actions.

I am trying to use Fluid with an explicitly called action like this in 4.3:
$view->render('someName');
This makes Fluid look for a file called 'somename', which in my oppinion should not be.

TemplateView.php:

```
    protected function resolveTemplatePathAndFilename($actionName = NULL) {
    ...
      $actionName = ($actionName !== NULL ? $actionName :
    $this->controllerContext->getRequest()->getControllerActionName());
      $actionName = strtolower($actionName);
    ...
    }
```

This is not the right place to do this. this should be done somewhere, in getControllerActionName.
Partials dont get converted to lowercase names btw.
