Tags:			
Subject:	page.title		
Description			
<p>I thought it might be nice to be able to set a page title.</p> <pre><f:page.title>{blog.name}</f:page.title></pre> <p>Arguments:</p> <p>mode glue display</p> <p>Mode has three potential values: replace - overwrite the existing page title. This is the default. append - add the value to the end of the existing title prepend - add the value to the beginning of the existing title</p> <p>glue is the string to use if the value is append or prepend.</p> <p>display has two potential values: none - meaning the viewHelper renders nothing in the template. render - means that the tag will render it's children. This way you could use it in the context of an h1 tag like this:</p> <pre><h1><f:page.title display="render">{blog.title}</f:page.title></h1></pre>			

History

Tried it out and works well. Just had to figure out, that it only works with the default title generation of TYPO3 and this includes an ugly ':' (Doppelpunkt) after the title.

But this viewhelper is a really nice addition!

#2 - 2010-03-18 11:50 - Thomas Deinhamer

Some additional info which I just googled for some time.

To teach 'indexed_search' which title to display in the Search results list, one can tell it by setting it via:

```
$GLOBALS['TSFE']->indexedDocTitle = $newTitle;
```

So in my simple case I just added this little line to the viewhelper, and now the indexed search will also display nice titles for pages which act as a single/details page, displaying product, news, etc. data.

#3 - 2010-07-12 12:42 - Bastian Waidelich

- *Tracker changed from Feature to Suggestion*
- *Project changed from TYPO3.Fluid to Fluid - ViewHelper - Incubator*
- *Category deleted (ViewHelpers)*

#4 - 2010-07-12 13:15 - Bastian Waidelich

- *Subject changed from viewHelper for setting page title from a template to page.title*

#5 - 2012-01-24 10:02 - Lorenz Ulrich

+1 for this to go into a Fluid release. Are there any chances if I push this to Gerrit?

#6 - 2014-06-18 11:36 - Florian Michel

This feature is already implemented in FedExt 'VHS', see: <http://fluidtypo3.org/viewhelpers/vhs/master/Page/Header/TitleViewHelper.html>
