PHP Version:	
Complexity:	
Is Regression:	No
Sprint Focus:	

Subject:	StandaloneView must require upperCase file names for Partials and Layouts

Description
In order to ensure the convention of uppercased filenames is met, a check for the casing of those files is added.

History

#1 - 2014-11-27 19:05 - Gerrit Code Review

- Status changed from New to Under Review

Patch set 1 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.

It is available at http://review.typo3.org/34708

#2 - 2014-11-28 08:06 - Henrik Ziegenhain

Is this also in 6.2.7 now?!

After updating from 6.2.5 to 6.2.7 I get the following exception:

> Uncaught TYPO3 Exception
>
> #1288092556: Could not load partial file. Tried following paths: "/www/htdocs/hosting/fileadmin/templates/layouts/Default.html",
>
> "/www/htdocs/hosting/fileadmin/templates/layouts/Default".

#3 - 2014-11-29 12:31 - Thomas Diedenhoven

I can reproduce the problem too (update from 6.2.6 to 6.2.7). I patched it temporary by commenting out the lines $actionName = ucfirst($actionName) in TYPO3\CMS\Fluid\View\TemplateView.php

#4 - 2014-12-05 15:28 - André Spindler

I can confirm this regression. But: "In order to ensure the convention of uppercased filenames is met" - where is this requirement defined - for integrators?

Templating is mainly done by integrators. IMHO there should be suggestions, but not requirements for then. For extension developers I support such requirements.

#5 - 2014-12-08 11:28 - Benjamin Mack

- Status changed from Under Review to Rejected

we will not ensure any casing for template files except the templates constructed from the action name.
