

Core - Bug # 63388

Status:	Closed	Priority:	Must have
Author:	Henrik Ziegenhain	Category:	Fluid
Created:	2014-11-28	Assigned To:	
Updated:	2015-01-02	Due date:	
TYPO3 Version:	6.2		
PHP Version:	5.5		
Complexity:			
Is Regression:	Yes		
Sprint Focus:			
Subject:	UpperCamelCase for Partials and Layouts is required		
Description			
<p>Hi all,</p> <p>I found a regression in 6.2.7 and I think it was introduced with #61361</p> <p>After updating from 6.2.5 to 6.2.7 I get the following exception:</p> <p>Uncaught TYPO3 Exception #1288092556: Could not load partial file. Tried following paths: "/www/htdocs/hosting/fileadmin/templates/layouts/Default.html", "/www/htdocs/hosting/fileadmin/templates/layouts/Default".</p> <p>The expected file is located in /www/htdocs/hosting/fileadmin/templates/layouts/default.html - this worked for years and now breaks with a patch level release.</p> <p>Breaking in Version 7 would be OK, but not in 6.2 LTS.</p> <p>I think, there are many other installations in the wild also affected by this.</p>
