

TYPO3.Flow - Bug # 6339

Status:	Resolved	Priority:	-- undefined --
Author:	Simon Schaufelberger	Category:	- Error Handler Report -
Created:	2010-02-04	Assigned To:	Karsten Dambekalns
Updated:	2010-10-20	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	F3\FLOW3\Error\Exception thrown in file ErrorHandler.php		
Description			
<pre>Warning: touch() [<a "%class%f3_flow3_security_authentication_provider_persistedusernamepasswordprovider")="" "c:="" "namespace="" "no="" "touch()="" \$advicechains;[]="" %class%f3_flow3_security_authentication_provider_persistedus="" >function.touch<="" ...istedusernamepasswordprovider_aopproxy_development")="" ...roxy_development="" 1="" 2="" 208="" 208,="" 3="" 4="" 5="" 6="" 7="" 8="" 9="" [<a="" a>]:="" a5785fc0b2b4="" aop="" aopproxy_development",="" array)="" array,="" backend="" because="" bootstrap::initialize()="" bootstrap::initializeaop()="" c:="" cache="" classes="" core="" create="" data="" directory="" directory",="" does="" er_aopproxy_development",="" error="" errorhandler::handleerror(2,="" f3\flow3="" f3\flow3\security\authentication\provide...="" file="" filebackend.php="" filebackend.php",="" filebackend::set("f3_flow3_security_authentication_provider_persistedusernamepasswordprovider_a="" filebackend::settag("f3_flow3_security_authentication_provider_persistedusernamepasswordprovide="" flow3="" flow3.php")="" flow3_aop_proxyclasscodes^f3_flow3_security_authentication_provider_persistedusernamepass="" framework="" framework::initialize(array)="" frontend="" href="function.touch" htdocs="" in="" in..."?<="" it="" line="" mepasswordprovider_aopproxy_development="" no="" null)="" or="" packages="" pre="" r_aopproxy_development",="" require("c:="" return="" say="" scripts="" sistedusernamepasswordprovider="" stringfrontend::set("f3_flow3_security_authentication_provider_persistedusernamepasswordprovider="" such="" tags="" temporary="" to="" touch("c:="" unable="" why="" xampp="" }[]="" }[]",=""></pre>			

History

#1 - 2010-02-18 19:31 - Karsten Dambekalns

- Status changed from New to Resolved
- Assigned To set to Karsten Dambekalns

The path it tries to touch is too long for windows. Try setting the path to the temporary dir to something shorter, like c:\tmp

#2 - 2010-02-18 19:34 - Simon Schaufelberger

yes i know that i need to do that in windows but the error message is still wrong. is it possible to check the path length and throw an error if it is too long?

#3 - 2010-02-18 21:17 - Karsten Dambekalns

Possible, yes. But no longer needed with the new file caching backend available in SVN - paths are much shorter there. And the wrong error message should be fixed in PHP :)
