

## Getting Started - Bug # 6340

<b>Status:</b>	New	<b>Priority:</b>	Must have
<b>Author:</b>	Simon Schaufelberger	<b>Category:</b>	Content / Instructions
<b>Created:</b>	2010-02-04	<b>Assigned To:</b>	
<b>Updated:</b>	2010-10-20	<b>Due date:</b>	
<b>Subject:</b>	Wrong dokumentation for FLOW3.yaml setting		
<b>Description</b>			
<p>Here is written that you have to add the following line into FLOW3.yaml file:</p> <p><a href="http://flow3.typo3.org/documentation/tutorials/getting-started/gettingstarted.configuration/">http://flow3.typo3.org/documentation/tutorials/getting-started/gettingstarted.configuration/</a></p> <pre>utility: environment: temporaryDirectoryBase: 'C:/tmp/'</pre> <p>in the latest version alpha 7 this file does not exist and the setting MUST be done in Settings.yaml. i created the file FLOW3.yaml and tried it with this one but that does not affect anything.</p> <p>Also the syntax is wrong. it should be:</p> <pre>FLOW3:   utility:     environment:       temporaryDirectoryBase: 'C:/tmp/'</pre>
