

## Getting Started - Bug # 6341

<b>Status:</b>	New	<b>Priority:</b>	Must have
<b>Author:</b>	Simon Schaufelberger	<b>Category:</b>	
<b>Created:</b>	2010-02-04	<b>Assigned To:</b>	
<b>Updated:</b>	2010-10-20	<b>Due date:</b>	

**Subject:** Wrong dokumentation for FLOW3.yaml setting

### Description

Here is written that you have to add the following line into FLOW3.yaml file:

<http://flow3.typo3.org/documentation/tutorials/getting-started/gettingstarted.configuration/>

```
utility: environment: temporaryDirectoryBase: 'C:/tmp/'
```

in the latest version alpha 7 this file does not exist and the setting MUST be done in Settings.yaml. i created the file FLOW3.yaml and tried it with this one but that does not affect anything.

Also the syntax is wrong. it should be:

FLOW3:

utility:

environment:

```
temporaryDirectoryBase: 'C:/tmp/'
```

### History

**#1 - 2010-02-04 10:43 - Simon Schaufelberger**

- Target version set to 1.0.0 alpha 7

duplicate. sorry - browser error
