Core - Bug # 63684

Status:	New	**Priority:**	Should have
Author:	Karsten Nowak (undkonsorten)	**Category:**	
Created:	2014-12-08	**Assigned To:**	
Updated:	2015-07-16	**Due date:**	
TYPO3 Version:	6.2		
PHP Version:	5.5		
Complexity:			
Is Regression:	No		
Sprint Focus:			
Subject:	sys_language_uid and sys_language_content are always the same		

Description

I'm trying to use content_fallback on a page with 3 languages. The lang uid's are 0,1 and 2.

The requested page exists in all languages. The content is only available in langUid 0 and langUid 1. Not in langUid 2.

My TS setup:

    sys_language_mode = content_fallback:1,0
    sys_language_overlay is not set.

On "Frontend Localization Guide" it says for "content_fallback : 1,0" the following:

If sys_language_uid(set by &L) = 2 then

TSFE->sys_language_uid = 2
TSFE->sys_language_content = 1

But on my site TSFE->sys_language_content is 2. Whatever i try in content_fallback (0 or 1) the TSFE->sys_language_content is never the fallback language uid. Every time the same like the sys_language_uid.

I tested this in TYPO3 6.2.6 and 6.2.8.

PHP is 5.5.18
