History

#1 - 2014-12-23 19:40 - Mathias Schreiber

- Target version changed from 7.0 to 7.1 (Cleanup)

#2 - 2014-12-23 19:51 - Mathias Schreiber

- Target version changed from 7.1 (Cleanup) to 7.3 (Packages)

#3 - 2015-06-15 17:08 - Benjamin Mack

- Target version changed from 7.3 (Packages) to 7.4 (Backend)

#4 - 2015-06-30 19:36 - Nicole Cordes

- Status changed from New to Needs Feedback

You can simply install the extension devtools to get a visible icon for changed extensions.

#5 - 2015-07-06 12:38 - Stefan Busemann

But is the installation of an external extension a solution for this issue? In my eyes, this is a critical functionality, which should be covered by em and (or) pm

#6 - 2015-07-07 09:52 - Alexander Opitz

Often the checksums were not updated so in the past you often had this hint but nothing really changed. So as user who only use extensions you were lost.

If you are an integrator who updated extensions you should always set the extension state to 'excludeFromUpdates' in the ext_emconf.php (See <http://docs.typo3.org/typo3cms/CoreApiReference/ExtensionArchitecture/DeclarationFile/Index.html>) so that no one updates the extension accidentally. Course only you as integrator knows why and what was changed.

So IMHO no real use of the checksum hint in a default installation.

#7 - 2015-07-28 15:31 - Riccardo De Contardi

- Status changed from Needs Feedback to Closed

After a brief discussion with the core team, they agree that this functionality will not be included in the core and I therefore close the ticket; please use the extension devtools to cover it. As Alexander Opitz suggests, if you want to exclude an extension from being updated, set its state to 'excludeFromUpdates' in `ext_emconf.php`.

If you think that this is the wrong decision, then please write to the mailing list typo3.teams.bugs with issue number and an explanation or open a new ticket and add a relation to this ticket number.
